

UV disinfection for municipal water supply

Process: Hygienisation with UV and oxidation with ozone
Problem: Surface water with increased organics, colour and bacterial contamination
City/Country: Ringerike/Norway

Project info:

Capacity: 3 x 445 m³/h
Number of plants: 3 units
Power: 3 x 2,65 kW
Year of realisation: 2018
Specialities: Ozonation, filtration via multi-layer filter and UV disinfection
